Description

The company's range includes basic, manual-operation machines as well as complex, state-of-the-art profile machining centres with CNC control. Moreover, the company offers all of the other components needed for setting up efficient, safe and ergonomic production lines, including assembly equipment, roller conveyors, transport trolleys, glazing units and tools. Their machines and operating equipment have a modular design and all components are compatible with each other, providing the necessary flexibility to adapt one's production equipment at any time to suit the growing demands of the enterprise. The company also offers assistance in the planning of the clients' production. All of their products are "made by elumatec", which stands for their promise of quality with exceptional precision, durability and stability.

Areas of Activities

Machines, tools and equipment for construction and public works

Offer

Basic, manual-operation machines and complex, state-of-the-art profile machining centres with CNC

A wide variety of industrial machines and tools: Saws

Automatic saws

Controller variants

Double mitre saws

Glazing bead saws

Metal band saws

Metal circular saws

Mitre saws

Notching saws

Table saws

Up-cut saws

Vee-notch and notching saws

Assembly and logistic

Assembly stands

Commissioning trolleys

Equipment holders

Frame assembly stations

Gasket trolleys

Glass compartment trolleys / Glazing bead trolleys

Glass sorting

Glass handling system

Hardware trolleys

Horizontal assembly tables

Inspection and glazing units

Lift and turn tables

Profile transport trolleys

Rack systems

Reinforcement trolleys

Rotating tables

Sash centres

Sash hardware

Tilting tables

Tool trolleys / Tools

Vertical roller conveyors

Reinforcement screwdriver systems

Reinforcement screwdriver system

Rotary screwdrivers

Welding/Cleaning

2-head welding machines

3-head welding machines

4-head welding machines

Corner cleaning machines

Single-head welding machines

Welding - Corner cleaning

Turbo-Line

Hardware and assembly centres

Hardware and assembly centres

Length stop and measuring systems

Glazing bead measuring systems

Length stop and measuring systems

Corner crimpers

Inspection and glazing units

Inspection and glazing units

Routers

Automatic water slot routers

End milling machines

Mullion routers

Multi-spindle copy routers

Router and triple spindle drill

Single-spindle copy routers

Profile machining centres
