- 20-11-2015 (10:00 a.m. to 7 p.m.)
- 21-11-2015 (10:00 a.m. to 7 p.m.)

Description

3D printing is the company's motto. The company believes that 3D printing will change the paradigm of mass-production, bringing it closer to the individual consumer, in such a way as to take us into a more leisure-oriented society. They consider personal creative expression to be a way to the future, unlike any economic theory that, during the last few years, has left people with no space for breathing creativity and inspiring innovation in other types and forms.
