- 19-11-2015 (12:00 a.m. to 7 p.m.)
- 20-11-2015 (10:00 a.m. to 7 p.m.)
- 21-11-2015 (10:00 a.m. to 7 p.m.)

Description

For every project, from small scale construction to major engineering works, SECIL offers a wide range of white and grey cement products, of different types and classes, produced at the Secil-Outão, Cibra-Pataias and Maceira-Liz plants. SECIL's cement products are certified under European Standard EN 197-1 and are submitted to constant quality control, from the production phase through to placement on the market, using the best available technologies. Although the core of its activity is the production of cement, Secil integrates a set of about 40 companies - The Universe Secil - which operates in complementary areas such as concrete production, prefabricated, hydraulic lime, plaster, coatings, fiber cements and quarrying.
