- 20-11-2015 (10:00 a.m. to 7 p.m.)
- 21-11-2015 (10:00 a.m. to 7 p.m.)

Description

Gyptec Ibérica, a Portuguese company part of the Preceram Group, has been engaged in the production of plasterboards, using clean and environmentally sustainable methods, since 2009. The strategic location of the Industrial and Business Cluster of Figueira da Foz, in the centre of Portugal, was crucial to the decision to deploy the new industrial plant. The Cluster is integrated into the most complete traffic distribution node in the central region of Portugal, where maritime, rail and roadway networks are all interconnected. The new Gyptec Ibérica, SA factory has a production area of 13.500 m², located on a plot of 42.000 m² built at an industrial cluster with 126 hectares of land. The group has industrial and commercial units in various locations in Portugal (Figueira da Foz, Pombal, Agueda, Oliveira do Bairro) and has its own national and international distribution fleet that bring the high-quality Gyptec technical plasterboards to a large number of construction works. Your project can be the next one.
