THE NATURE AND US

ARE YOU READY TO BRING NATURE BACK HOME?

Cork is the bark of the noble oak cork tree "Quercus Suber", which has a lifespan of over 200 years. Every 9 years this bark is extracted in an ancient and natural process, that does not harm the tree. Cork is a 100% natural, sustainable and recyclable material, with unmatched qualities that can be used in a myriad number of forms, shapes and purposes.

Cork oak forest has an astonishing ability to absorb CO2 from the atmosphere. It is estimated that it can absorb up to 14 Million Tons of CO2 per Year. The cork industry and all its products show us that sustainable development may not be utopia, it may indeed be a reality.

We have been in the cork industry since 1924. Since then, we have implemented a vertical business model, which integrates cork tree forests, manufacturing, research and development as well as distribution. The cork oak forest is where we find not only the raw materials for our industry, but also the inspiration and attitude for a balanced development, matched with a pioneer attitude and constant innovation.

As result, we have grown as a company, and developed a wide variety of cork products, which are the reason for our success in both domestic and international markets.

At our plants, cork is transformed in new and ecologically friendly ways; from cork stoppers to granulated cork, from footwear to acoustic and thermal insulation and from flooring to wall covering and fabrics.

We have evolved... in production capacity, in quality and product diversity through a group of companies strategically organized in core and complementary business areas.

We overcame barriers, introduced cork to new businesses and sectors, and by doing so, became one of the world leaders in the cork industry.

By maintaining natural cork's features and applying innovation, new possibilities are created in a long cycle of sustainability. That's the beauty of our products.

We are visionaries.
We are innovators.
We are YOUR global cork solution.

ENDLESS POSSIBILITIES

SINCE 1924 – SUSTAINABLE AS NATURE

1924

1975

2010

2012

1924 - Beginning of activity: cork stoppers production

1955 - Significant increase in exports

VERTICAL INTEGRATION MODEL

The mark of responsible forestry

We make the most of our raw materials.

Today we offer our clients a wide range of cork products.

All this without cutting a single cork tree. The protection of our natural resources is our greatest gift. Is the guarantee of our continuity.

We are the global solution.
